## **PURPOSE**

### **Primary objective**

Determine the proportion of study eligible children between the ages of 0 and 20 who used pediatric subspecialty care at least once in a given calendar year between 2010 and 2021 in any care setting (i.e., in an inpatient hospital, outpatient, emergency department, or community-based practice care setting), stratified by age group and sex.

### **Secondary objective**

For each pediatric subspecialty, determine the most common diagnoses among patients based on the number encounters in the outpatient or community-based practice care setting from 2010 to 2021.

# DATA SOURCE

## Overview of PEDSnet

PEDSnet is a Clinical Research Network providing a database based on the Observational Health Data Science and Informatics (OHDSI) model and containing data from:

- Children’s Hospital Colorado
- Children’s Hospital of Philadelphia
- Cincinnati Children’s Hospital Medical Center
- Nationwide Children’s Hospital
- Nemours Children’s Health
- Seattle Children’s Hospital
- Stanford Children’s Health
- Ann & Robert H. Lurie Children’s Hospital of Chicago

The data is imported from individual hospital Electronic Health Record systems and transformed into the OHDSI Common Data Model to produce a structured, searchable database. Hundreds of Data Quality checks are applied to ensure that the data is largely free of issues such as missing values, implausible values, unusually high or low counts in any visit category, and inconsistencies between years.

Within the OHDSI structure, vocabulary terms, called “concepts”, (condition, specialty, etc) are each given fixed concept\_id’s which are integer keys that are used in querying. The PEDSnet database vocabulary tables also include the source of the field (vocabulary\_id), the name of the concept, and the code used in the original source.

PEDSnet Database Version V.47 is used. This code was written using R version 4.2.2 and the following packages:

Package	Version
broom	1.0.3
DBI	1.1.3
dplyr	1.1.0
dbplyr	2.3.0
kableExtra	1.3.4
lubridate	1.9.2
magrittr	2.0.3
readr	2.1.4
rlang	1.0.6
scales	1.2.1
srcr	1.1.0
tibble	3.1.8
tidyr	1.3.0

After the original code was written, code review was performed to check for consistency and efficiency. Appropriate revisions were made to improve performance of the report generation.

Code is available at the public GitHub repository [https://github.com/PEDSnet/Subspecialty\\_Analysis](https://github.com/PEDSnet/Subspecialty_Analysis)

## Denominator

Within the PEDSnet database, we select all patients with an outpatient visit (based on visit concept id = 9202 as per OHDSI conventions) in the time period Jan 1, 2010 - Dec 31, 2021, where the patient is  $\geq 0$

and  $< 21$  years old, and where the specialty concept id for provider or care site is one of the following two codes:

concept_id	concept_code	concept_name	vocabulary_id
38003851	207Q00000X	Family Medicine	National Uniform Claim Committee (NUCC)
2000000063	OMOP generated	General Pediatrics	PEDSnet

We also save inpatient (including emergency department and observation) visits for patients from the outpatient cohort defined above, using the same year ranges (2010-2021) and age ranges (0-20 yo) for use in other denominators.

Patients enter a denominator for a calendar year based on having a qualifying visit (as defined above) in that year or the preceding year. So the denominator for 2011 is the distinct patients with a general outpatient visit in either 2010 or 2011.

Patients are broken into subgroups based on the following factors:

- Gender (Male or Female).
- Age (based on age at entry into denominator for that year).
  - $<1$  (infancy).
  - 1 – 4 (early childhood).
  - 5 – 11 (middle childhood).
  - 12 – 17 (adolescence).
  - 18 – 20 (young adulthood).
- Insurance (hierarchical)
  - If the patient is ever on public insurance (Medicare, Medicaid, other Public) in their general outpatient visits, they are listed as “Public”.
  - Otherwise if they ever listed as Private/Commerical insurance in their general outpatient visits, they are listed as “Private”.
  - Otherwise they are listed as “Unknown/Self-Pay”.
- Race/Ethnicity
  - If the patient ethnicity is listed as Hispanic, they are listed as Hispanic.
  - Otherwise if they are Asian or Pacific Islander, they are listed as Asian/PI.
  - Not given and unknown are combined as “Unknown”
  - Otherwise they are listed as race in the race\_concept\_id field, with the “non-Hispanic” modifier.

## Numerator

Within the PEDSnet database, we select all patients with an outpatient, emergency, inpatient or observation visit in the years 2010-2021, where the patient is  $\geq 0$  and  $< 21$  years old, and where the specialty concept id is one of the concept\_id’s associated with the specific subspecialties of interest. Depending on the specific analysis, the numerator may be count of distinct patients with outpatient, inpatient/observation, inpatient/observation/emergency or all in-person visits.

Specialty visits are linked to the denominator table by reference year – so the numerator for 2010, for example, is linked to the denominator based on distinct patients in 2009 and 2010, although the specialty visits are in 2010.

## RESULTS

**Table 1: Attrition**

cohort	n
All Patients in Database	8,692,205
Patients with Qualifying General Outpatient Visit	1,634,296

**Table 2: Distribution of patients in sample**

Group	mean (SD) or n (%)
Age at entry, years	5.51 (5.63)
<1 (infants)	529,821 (32.4%)
1 – 4 (early childhood)	336,525 (20.6%)
5 – 11 (middle childhood)	452,369 (27.7%)
12 – 17 (adolescence)	287,542 (17.6%)
18 – 20 (young adulthood)	28,039 (1.7%)
Distinct years in cohort by age <sup>a</sup>	3.25 (2.67)
Last age seen, years	8.49 (6.16)
Duration in cohort, years <sup>b</sup>	3.98 (3.42)
<b>Gender</b>	
Female	800,313 (49.0%)
Male	833,983 (51.0%)
<b>Race/Ethnicity</b>	
Asian/PI	92,452 (5.7%)
Black/AA, non-Hispanic	427,375 (26.2%)
Hispanic	221,794 (13.6%)
Multiple	51,959 (3.2%)
Other/Unknown	193,090 (11.8%)
White, non-Hispanic	647,626 (39.6%)
<b>Insurer</b>	
Private	708,302 (43.3%)
Public	763,251 (46.7%)
Unknown/Self-Pay	162,743 (10.0%)
<b>Entry Year</b>	
2011	493,628 (30.2%)
2012	80,616 (4.9%)
2013	87,746 (5.4%)
2014	127,176 (7.8%)
2015	125,135 (7.7%)
2016	121,143 (7.4%)
2017	110,371 (6.8%)
2018	116,907 (7.2%)
2019	125,526 (7.7%)
2020	101,978 (6.2%)
2021	144,070 (8.8%)

<sup>a</sup> Individual years where patient contributes visits to general outpatient denominator

<sup>b</sup> Elapsed time from first year seen to last year seen in general outpatient denominator

**Table 3: Number of children in denominator stratified by age group, sex, and insurer**

This is based on denominator, all patients having 1 + general pediatrics visit in the calendar year or the prior yer

Age bracket is based on age at the beginning of the 2-year denominator period

**Table 3A: Number of children in denominator stratified by age group and sex**

Note: since age varies by year, patients can be in multiple age brackets and so age brackets will not sum up to actual number of patients

Year	Gender	<1 (infants)	1 – 4 (early childhood)	5 – 11 (middle childhood)	12 – 17 (adolescence)	18 – 20 (young adulthood)
Overall	Female	255,784	311,493	374,394	281,005	68,672
Overall	Male	274,037	339,700	397,395	273,110	57,863
2011	Female	42,746	58,767	84,103	50,936	6,565
2011	Male	45,385	62,282	88,232	49,458	5,154
2012	Female	43,100	60,541	87,676	54,017	7,228
2012	Male	45,711	64,109	92,296	52,772	5,684
2013	Female	44,256	62,502	92,978	58,103	7,819
2013	Male	47,377	66,848	97,822	56,807	6,207
2014	Female	48,116	69,528	104,277	66,748	8,887
2014	Male	51,281	74,529	110,214	65,575	7,206
2015	Female	51,767	73,643	115,838	75,854	10,103
2015	Male	55,328	79,320	122,037	74,508	8,383
2016	Female	54,597	77,301	123,753	83,060	11,032
2016	Male	58,388	83,886	130,522	81,029	9,010
2017	Female	55,451	79,767	128,658	87,712	11,703

**Figure 1: Population pyramid for age vs insurer**

Numbers normalized by count of distinct patients assigned to insurer type. Patients seen at different ages are assigned to each age

**Table 4: Proportion of children receiving outpatient, inpatient or emergency care from a pediatric subspecialist in an outpatient department or community-based practice, overall and stratified by calendar year**

**Table 4A: Proportion of children receiving outpatient care from a pediatric sub-specialist, overall and stratified by calendar year**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Overall	1,634,296	707,694 (43.3%)	315,117 (19.3%)	1.91 (1.44)
2011	493,628	97,596 (19.8%)	23,169 (4.7%)	1.36 (0.78)
2012	513,134	100,596 (19.6%)	25,073 (4.9%)	1.38 (0.81)
2013	540,719	109,504 (20.3%)	28,858 (5.3%)	1.41 (0.85)
2014	606,361	125,967 (20.8%)	34,584 (5.7%)	1.44 (0.89)
2015	666,781	136,957 (20.5%)	38,323 (5.7%)	1.46 (0.92)
2016	712,578	144,912 (20.3%)	41,075 (5.8%)	1.46 (0.93)
2017	740,059	150,275 (20.3%)	42,645 (5.8%)	1.47 (0.96)
2018	772,591	157,644 (20.4%)	45,619 (5.9%)	1.49 (0.99)
2019	815,555	173,388 (21.3%)	51,793 (6.4%)	1.51 (1.01)
2020	820,679	147,875 (18.0%)	41,478 (5.1%)	1.47 (0.95)
2021	858,551	172,104 (20.0%)	50,557 (5.9%)	1.49 (0.97)

Denominator is all patients with generalist outpatient visit that year or prior year, or all patients in that set for overall  
Numerator in 'Seeing > 1 Specialist' is all patients in denominator who also had at least one specialist outpatient visit that year

**Table 4B: Proportion of children receiving outpatient, inpatient or emergency care from a pediatric subspecialist, overall and stratified by calendar year**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Overall	1,634,296	928,211 (56.8%)	471,032 (28.8%)	2.08 (1.56)
2011	493,628	155,850 (31.6%)	44,781 (9.1%)	1.43 (0.85)
2012	513,134	161,897 (31.6%)	46,940 (9.1%)	1.44 (0.86)
2013	540,719	169,813 (31.4%)	50,202 (9.3%)	1.46 (0.89)
2014	606,361	190,809 (31.5%)	57,792 (9.5%)	1.48 (0.93)
2015	666,781	205,820 (30.9%)	63,718 (9.6%)	1.50 (0.96)
2016	712,578	219,378 (30.8%)	68,104 (9.6%)	1.50 (0.97)
2017	740,059	229,876 (31.1%)	71,574 (9.7%)	1.51 (0.99)
2018	772,591	240,810 (31.2%)	76,030 (9.8%)	1.52 (1.01)
2019	815,555	265,243 (32.5%)	84,695 (10.4%)	1.54 (1.02)
2020	820,679	218,772 (26.7%)	62,701 (7.6%)	1.47 (0.95)
2021	858,551	261,648 (30.5%)	78,130 (9.1%)	1.50 (0.98)

Denominator is all patients with generalist outpatient visit that year or prior year, or all patients in that set for overall  
Numerator in 'Seeing > 1 Specialist' is all patients in denominator who also had at least one specialist outpatient, inpatient or emergency department visit that year

**Table 4C: Proportion of children receiving outpatient care from a pediatric sub-specialist in an outpatient department or community-based practice, stratified by insurer**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Private	708,302	260,288 (36.7%)	95,640 (13.5%)	1.66 (1.16)
Public	763,251	372,139 (48.8%)	183,216 (24.0%)	2.07 (1.58)
Unknown/Self-Pay	162,743	75,267 (46.2%)	36,261 (22.3%)	1.97 (1.43)

Denominator is all patients with generalist outpatient visit who were members of that insurer group

Numerator is all patients in denominator who also had at least one specialist outpatient visit

**Table 4D: Proportion of children receiving outpatient, inpatient or emergency care from a pediatric subspecialist, stratified by insurer**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Private	708,302	318,360 (44.9%)	131,205 (18.5%)	1.76 (1.25)
Public	763,251	507,195 (66.5%)	283,100 (37.1%)	2.25 (1.69)
Unknown/Self-Pay	162,743	102,656 (63.1%)	56,727 (34.9%)	2.22 (1.61)

Denominator is all patients with generalist outpatient visit who were members of that insurer group

Numerator is all patients in denominator who also had at least one specialist outpatient, inpatient or emergency encounter

**Table 4E: Proportion of children receiving outpatient care from a pediatric subspecialist, stratified by race/ethnicity**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Asian/PI	92,452	36,398 (39.4%)	14,934 (16.2%)	1.81 (1.35)
Black/AA, non-Hispanic	427,375	208,373 (48.8%)	101,043 (23.6%)	1.98 (1.42)
Hispanic	221,794	106,793 (48.1%)	50,831 (22.9%)	2.03 (1.56)
Multiple	51,959	24,690 (47.5%)	11,659 (22.4%)	2.01 (1.56)
Other/Unknown	193,090	58,262 (30.2%)	18,827 (9.8%)	1.59 (1.14)
White, non-Hispanic	647,626	273,178 (42.2%)	117,823 (18.2%)	1.89 (1.45)

Denominator is all patients with generalist outpatient visit and who were members of that race/ethnicity

Numerator is all patients in denominator who also had at least one specialist outpatient visit

**Table 4F: Proportion of children receiving outpatient, inpatient or emergency care from a pediatric subspecialist, stratified by race/ethnicity**

Year	Denominator	Any Outpatient Specialty Visit	Seeing > 1 Specialist	Average # of Specialists seen (if any)
Asian/PI	92,452	45,911 (49.7%)	21,163 (22.9%)	1.92 (1.43)
Black/AA, non-Hispanic	427,375	295,635 (69.2%)	166,782 (39.0%)	2.20 (1.55)
Hispanic	221,794	137,613 (62.0%)	73,771 (33.3%)	2.19 (1.66)
Multiple	51,959	34,804 (67.0%)	19,087 (36.7%)	2.22 (1.68)
Other/Unknown	193,090	69,170 (35.8%)	24,844 (12.9%)	1.67 (1.24)
White, non-Hispanic	647,626	345,078 (53.3%)	165,385 (25.5%)	2.02 (1.57)

Denominator is all patients with generalist outpatient visit and who were members of that race/ethnicity

Numerator is all patients in denominator who also had at least one specialist outpatient, inpatient or emergency encounter

**Table 4G: Proportion of children receiving new and ongoing pediatric subspecialist referrals, overall and stratified by subspecialty or calendar year**

Denominator is all patients with generalist outpatient visit that year or year prior (or all in set for overall)

Numerator is all patients in denominator who also had at least one specialist outpatient visit to that particular subspecialty, divided into new (if no corresponding visit in prior years) or ongoing

**Figure 2: Specialty outpatient visits by Insurance Type**

All specialist visits dip in 2020 probably due to Covid.

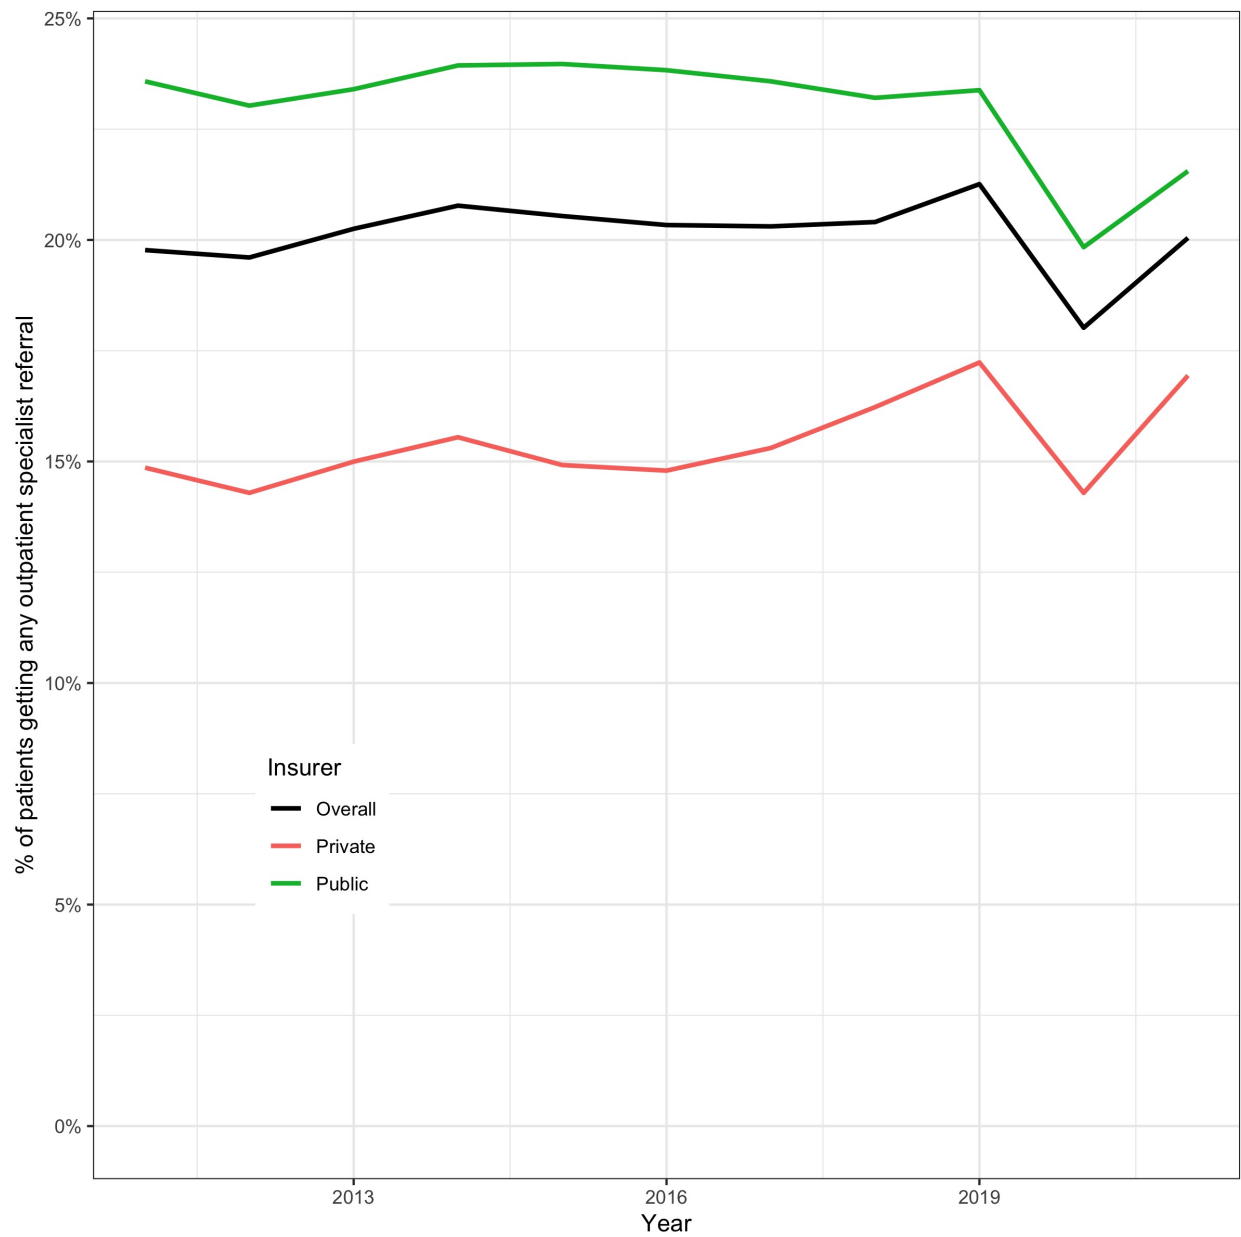

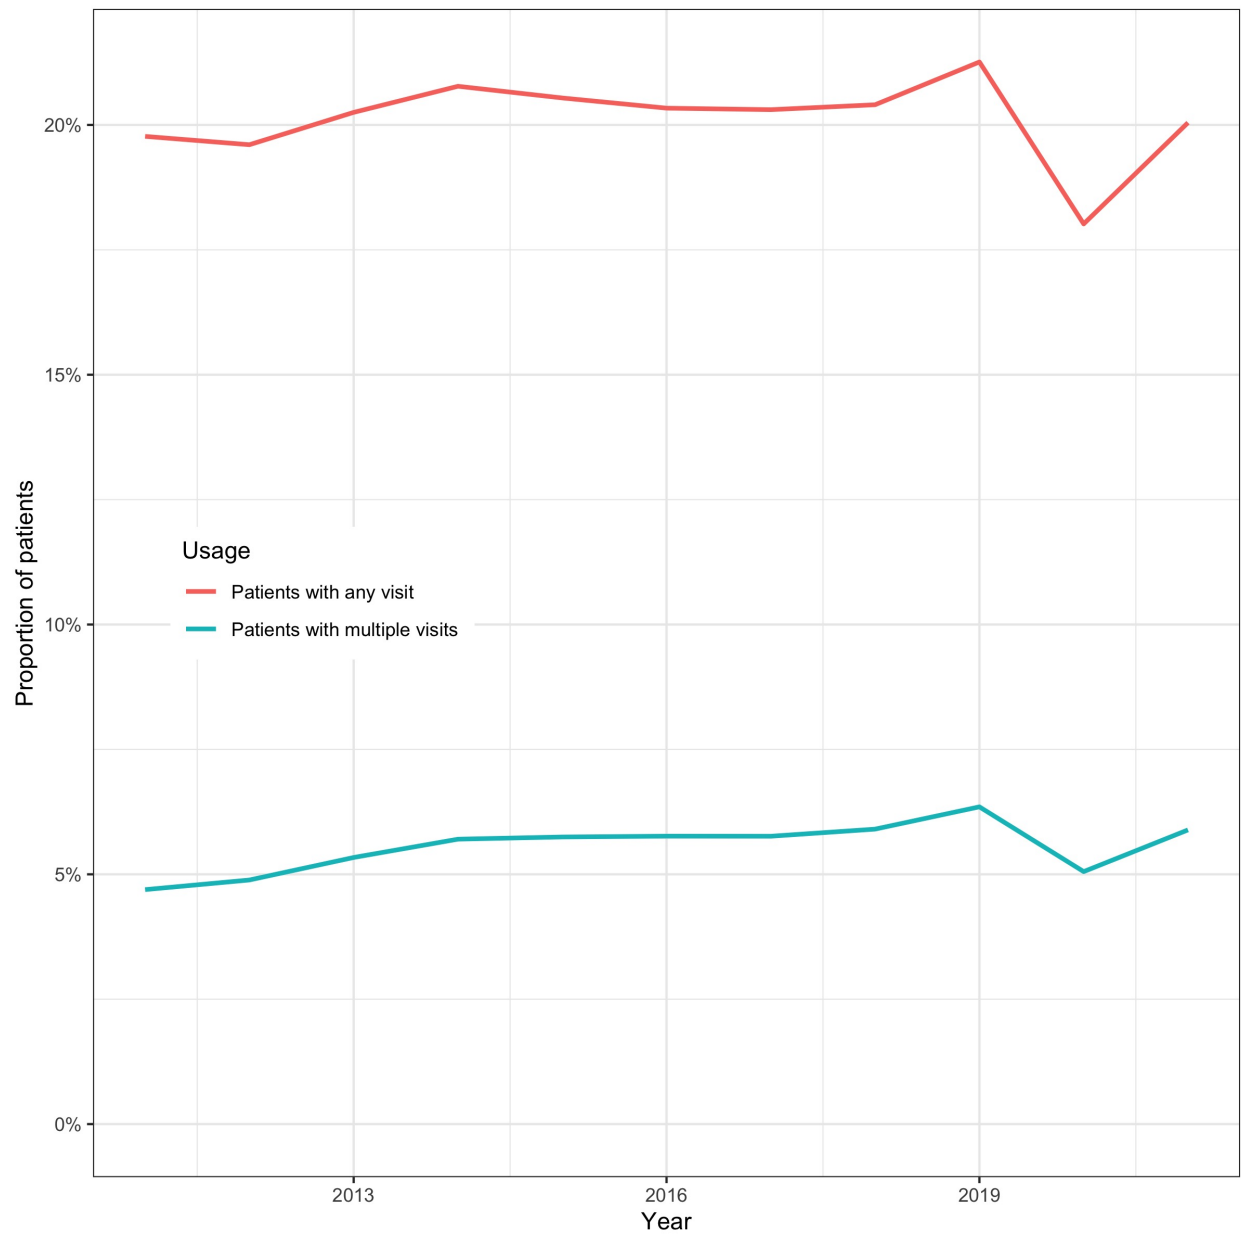

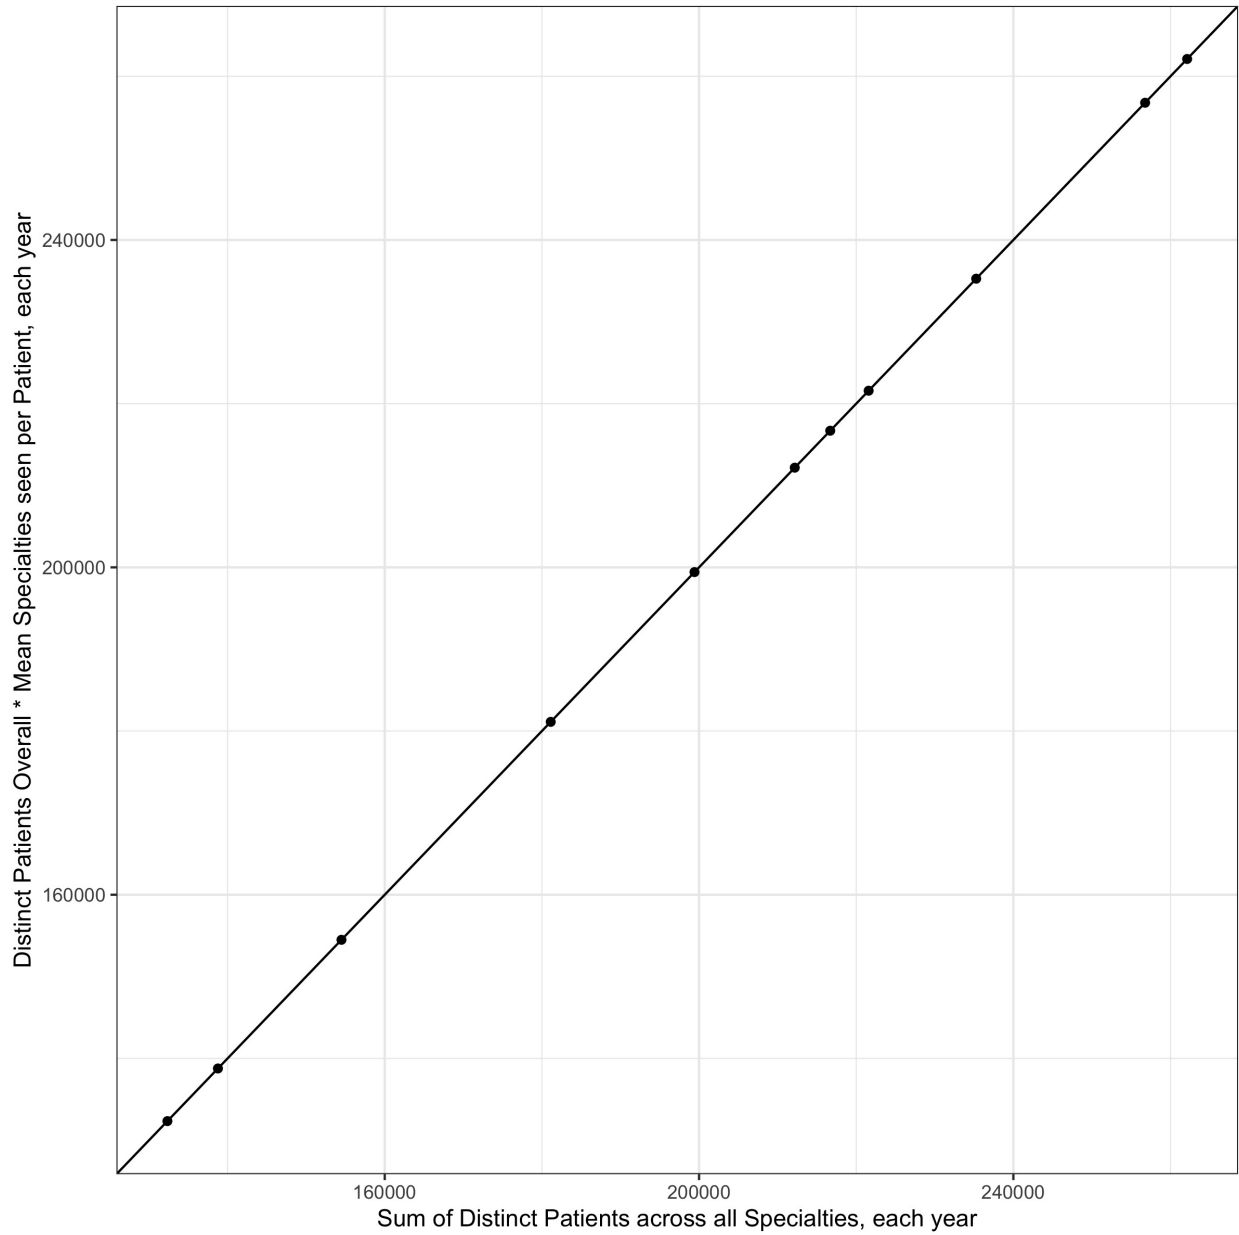

Figure 3: Specialist use trends from Table 4

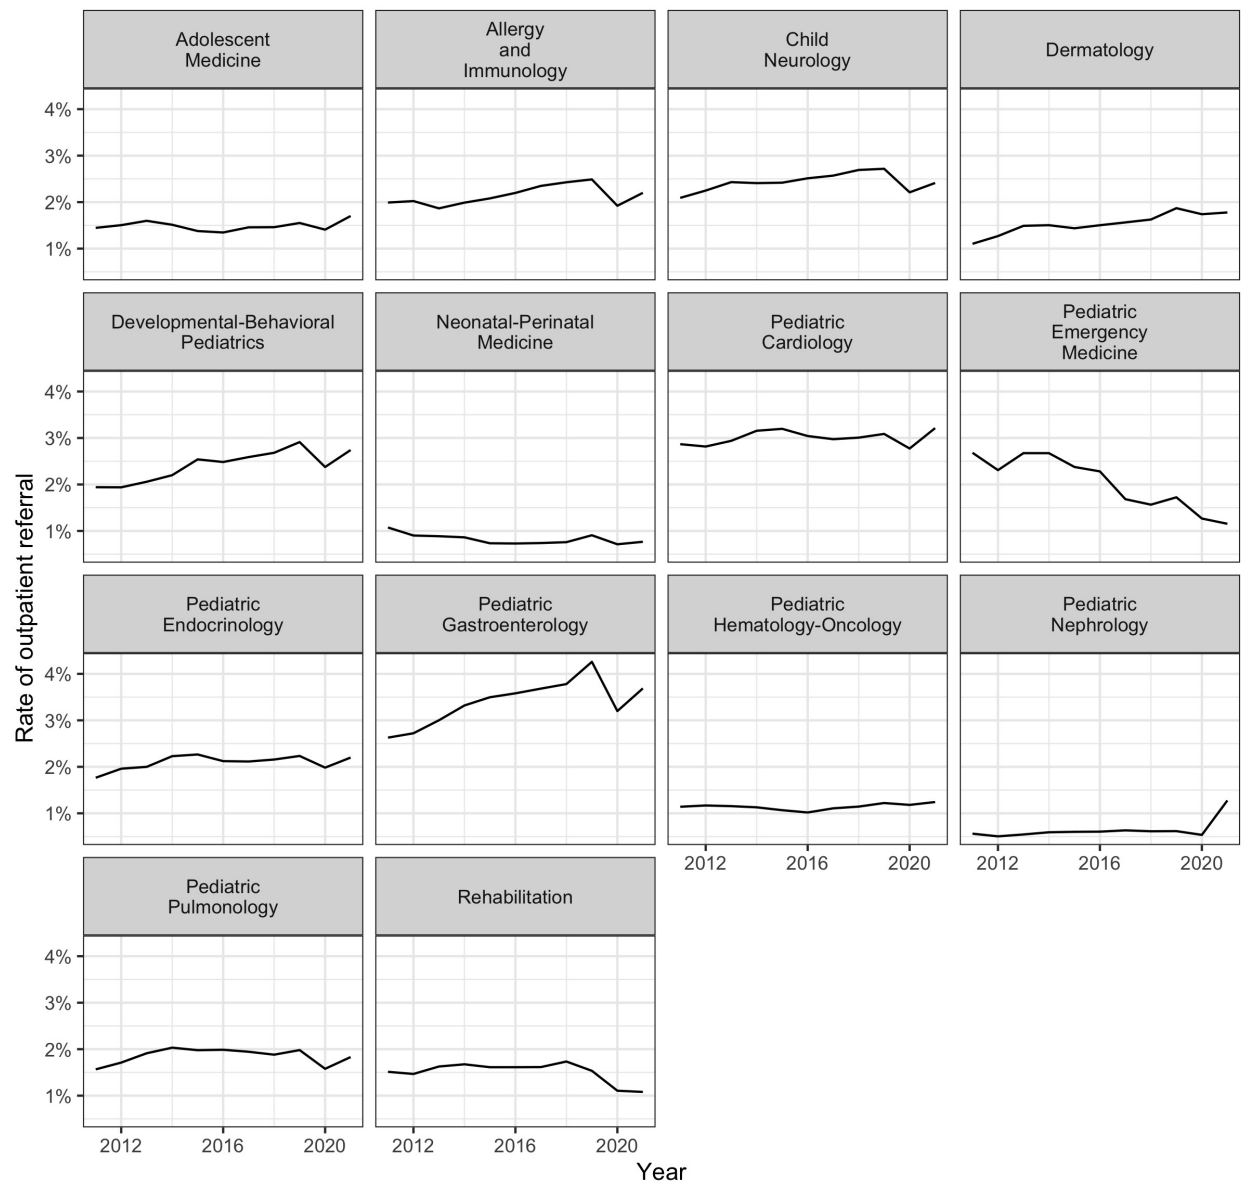

**Figure 4: Compare total number in numerator (across specialties) to distinct number patients x mean specialties seen**

Dots from Table 4A data for individual years. Line shows  $y=x$

**Figure 5: Plots of subspecialty referral rates vs calendar year**

This is a selection of outpatient specialties with larger rates ( $>1\%$ )

Denominator: patients with a general outpatient visit that year or prior year  
 Numerator: patients with a subspecialty outpatient visit that year

**Table 5: Proportion of children receiving care from a pediatric medical subspecialist in an outpatient department or community-based practice, overall and stratified by calendar year**

Denominator is all patients with generalist outpatient visit in that year or prior and who were members of that insurer group

Numerator is all patients in denominator who also had at least one specialist outpatient visit in that year and in that subspecialty

**Table 6: Proportion of children receiving care from a pediatric medical subspecialist in an inpatient or emergency visit, overall and stratified by calendar year and insurer**

Denominator is all patients with generalist outpatient visit in that year or prior (or overall) and who were members of that insurer group

Numerator is all patients in denominator who also had at least one specialist inpatient or emergency visit in that year and in that subspecialty

**Table 7: Proportion of children with at least one specialist outpatient, inpatient or emergency encounter by pediatric medical subspecialty**

Denominator is all patients with generalist outpatient visit in that year or prior (or overall) and who were members of that insurer group

Numerator is all patients in denominator who also had at least one specialist outpatient, inpatient or emergency visit in that year and in that subspecialty

**Table 8: Top 10 primary/first position SNOMED codes (with count of events) per pediatric medical subspecialty overall and by insurer based on outpatient visits.**

Codes relating to immunization status, encounter/followup status, and well child visits are dropped.

Denominator is all patients with generalist outpatient visit in that subspecialty for that insurer class (or overall) (see table 5)

Numerator is all patients in denominator who also had at least one specialist outpatient visit for that diagnosis

**Table 9: Regression analysis of referral patterns**

The following ignores the repeated measures since each person can belong to at least one denominator year. Computing those effects isn't trivial as there are almost two million distinct patients.

Term	Any Specialist Outpatient Visit		New Specialist Outpatient Visit	
	Odds Ratio	p-value	Odds Ratio	p-value
Male vs Female	1.03 (1.02-1.05)	0.000	1.01 (0.99-1.02)	0.423
<b>Age (vs &lt;1 Infant)</b>				
1 – 4 (early childhood)	0.78 (0.76-0.79)	0.000	0.48 (0.46-0.49)	0.000
5 – 11 (middle childhood)	0.78 (0.77-0.79)	0.000	0.45 (0.44-0.46)	0.000
12 – 17 (adolescence)	0.99 (0.97-1.01)	0.366	0.54 (0.53-0.55)	0.000
18 – 20 (young adulthood)	0.61 (0.59-0.64)	0.000	0.30 (0.28-0.33)	0.000
<b>Race/Eth (vs White, non-Hispanic)</b>				
Asian/PI	0.87 (0.85-0.90)	0.000	0.94 (0.90-0.98)	0.004
Black/AA, non-Hispanic	0.84 (0.83-0.86)	0.000	0.85 (0.83-0.87)	0.000
